

Summary

I'm a technical entrepreneur with experience building full-stack web applications. Currently exploring multiple problem spaces through market research, and seeking opportunities to contribute to impactful development projects.

Skills

- Languages: TypeScript, JavaScript, Python, SQL
- Frontend: Next.js, React, Tailwind CSS
- Backend: Hono, Express, tRPC (React Query), Node.js
- Databases & ORMs: PostgreSQL, Prisma
- Cloud & Deployment: Google Cloud Platform (Cloud Functions, Cloud Run), AWS (EC2), Vercel, Docker
- DevOps & Tools: Git, GitHub Actions, Neovim, Cursor
- Product: Posthog, Linear, Notion
- Dev team management through sprint cycles
- BizDev: Apollo email sequences & API, Meta conversions API

Experience

- **Sociable AI — Founding Engineer (September 2024 - Now)**
 - Led task management for an intern and one part-time engineer using Linear.
 - Architected and migrated a monolithic backend to a microservices architecture on Google Cloud Platform (Cloud Run, Pub/Sub, Cloud Tasks), enabling scalable and automated user-guided AI conversations through sequences, which is now used heavily by enterprise level customers to drive conversions for their businesses on socials.
 - Built discovery MVP for predicting viral social media posts into a marketable product. Included building a cost-efficient pipeline for processing social media videos into structured data, scalable systems to conduct searches across this data, and an extensive frontend/backend api refresh. Additionally, increased scraping algorithm efficiency by over 50%.
- **Sociable AI — Product Engineer Intern (March 2024 - August 2024)**
 - Worked with designer to build MVP for sequences feature.
 - Building personalized email automations based on recurring website visitors
 - Conducting manual outreach through cold emails, innovating scalable solutions to achieve similar results
- **Learn Prompting — Course Creator (January 2024)**
 - Conducted comprehensive research on generative AI tools and use cases, then wrote a course which included content and quizzes.
- **Prompt Systematic Review — Researcher (October 2023 - January 2024)**
 - Worked with researchers from UMD, OpenAI, Google
 - Managed repo, used GPT-4 for paper collection, researched multimodal prompt engineering, and built website for the paper.
- **Blossom Lawn Care — Founder & CEO (Summer 2023)**
 - Within two months, grew the company from no revenue to generating ~\$600 of monthly profit
